Academic English- Countable and Uncountable Nouns Review

(Using nouns with general and specific meanings/ Determiners with countable and uncountable nouns/ Useful vocabulary for talking about academic writing/ Countable and uncountable nouns word formation/ Advice on academic writing)

1 Error correction

In each pair of sentences below, which phrase has a general meaning (G) and which is wrong (X)? “G” means a statement about things in general such as all such things or the whole world.

- Academic papers tend to be filled with difficult words.
- Academic literatures tend to be filled with jargons.
- An interesting result can be obtained from a survey like this.
- An interesting information can be produced by a research like this.
- Job provides wage.
- Labour produces wealth.
- Mammal replaced dinosaur.
- The mammal replaced the dinosaur.

2 Identifying general statements from the grammar and context

In each pair of sentences below, which could be used to make a general statement (G) and which could only be talking about specific/ particular things (S)? There are no mistakes this time.

- Research papers are published in academic journals
- The research papers are published in the academic journals.
- The dog has long lived together with the human.
- The advice became part of the legislation.
- Software has transformed technology.
- The software has transformed the technology.
- The employee has a duty to protect the corporation.
- The aforementioned employee has a duty to protect the corporation.
- There is a new law about that due by the end of this parliament.
- A law must be passed by both houses of parliament.
3 Language analysis

Circle the countable nouns and underline the uncountable nouns above.

Make rules by adding determiners and/or “s” or nothing to the nouns below and labelling the result with G for general, S for specific or G/S when both meanings are possible (depending on the context).

+ countable noun +
+ countable noun +
+ countable noun +
+ countable noun +
+ uncountable noun +
+ uncountable noun +

Hint: The things you can add are “a/ an”, “the” and “s”, sometimes in combination. One has nothing added to it.

Which structures are not possible with countable and uncountable nouns?

NOT
+ countable noun +
+ countable noun +
+ uncountable noun +
+ uncountable noun +

Compare with the answers below the fold.

Suggested answers

countable noun + s – G
a/ an + countable noun – G/ S
the + countable noun – G/S
the + countable noun + s – S

uncountable noun – G
the + uncountable noun – S

NOT
a + countable noun + s

countable noun (just countable noun with nothing added)
a + uncountable noun
uncountable noun + s

Find examples of each of the correct ones above in the example sentences on the first page.

5 Identifying countable and uncountable nouns

Without looking above for now, add “some” and a final “s” to the countable nouns below and just “some” to the uncountable nouns (because a final “s” is impossible). You can use your grammar knowledge, the endings of the words, what you remember from above, or just what sounds right. If you want to check, try adding a number, “many”, “much”, “a”, etc and see if they sound okay. If not, the noun is uncountable.

6 Analysing countable and uncountable nouns

Without looking above for now, brainstorm examples words that end with these suffixes and then identify if they are associated with countable nouns (C), uncountable nouns (U) or both (C/U). Write the words with an “s” if that is possible. If you aren’t sure, try putting “some” in front of the noun and see if “s” is also necessary.

Note that some words that end with these things are not examples of suffixes, e.g. “sing” is not “s” + “ing”.

- ing

-sion/-tion

-ity

-ance/-ence

-ment

-ness

-ism

-ology

Look back at the earlier worksheets to help with this activity.

Underline U or C if one of those two is more common.

Check your answers with the next page.
Suggested answers
*Note that there may be examples of other forms that are not above.*

-ing – C/U

7 Matching countable and uncountable nouns

Try to think of countable words which have more or less the same meaning as the uncountable words given below or are countable examples of that thing. There were some examples in the worksheets above, but many other answers are possible. There may also be uncountable synonyms or examples, but please also include countable ones.

- academic literature
- advice/guidance
- brainstorming
- editing
- evidence/support
- homework
- importance of the research
- jargon/terminology
- persuasiveness
- plagiarism
- planning
- prior knowledge
- proofreading
- punctuation
- readability
- research
- vocabulary

Look at the previous worksheets for more ideas.
Match the words below to the words above. When there is more than one, it can go in more than one place above.

quote – some quotations

-ions
constitute – some constitutions
corporate – some corporations
institute – some institutions
locate – some locations

-ments
achieve – some achievements
assign – some assignments
require – some requirements
Countable and uncountable nouns and defining your terms writing task –
Fundamental terms in my field

Plan and write an essay on “Important terms in my field”. Note the plural S in the title, but how many terms you choose to explain is up to you as long as you write about at least two. Brainstorm and organise the information into two or three main paragraphs (= paragraphs in the body) below before you start, making sure that all things in one paragraph are related to each other and that a new paragraph means a new topic.

The essay should be written for people outside your field, explaining things that they are unlikely to know in terms that they can easily understand. Please include the planning stages below when you submit your essay. You also need to write an introduction, but a final summary or conclusion shouldn’t be necessary.

Brainstorming

Paragraph plan (= one sentence description of the topic of each paragraph of the main body of the essay)

Main paragraph 1:
___________________________________________________________________________
___________________________________________________________________________

Main paragraph 2:
___________________________________________________________________________
___________________________________________________________________________

Main paragraph 3: (optional)
___________________________________________________________________________
___________________________________________________________________________

Now write your essay.
