

British and American Household Vocabulary Quiz

Checking/ clarifying practice

Work in pairs with different worksheets. Take turns asking questions from your worksheet. The other person gets one point for each correct guess, and the questioner gets one point each time that the other person guesses wrongly, continuing until the other person gets the right answer or gives up. However, with Yes/ No questions only one guess is allowed. If the other person gives up before answering for the first time or before answering again, the questioner should just say the answer and no points are given.
