Future Predictions- Guess the year
Will for predictions/ Future continuous/ Technical English
Using the tense that your teacher tells you to, choose one of the years below and make predictions about life in that time until your partner guesses the right year. Use the list of inventions on the next page to help you if you like. Note that some of the times listed might be the same as each other, depending on what year it is when you are speaking.

Times	Possible things to speak about
At the end of this year	Accommodation
This time next year	Birth/ Childhood
At the end of next year	Computing
The year after next (= In two years)	Crime/ Policing
In five years	Education
At the end of this decade	Entertainment
In a decade	Fashion/ Clothing
In 2030	Food and drink/ Nutrition
In two decades	Holidays
In half a century	Medicine
At the end of this century	Personal hygiene/ Personal grooming
In a century	Retirement/ Old age
In 2200	Sports
In half a millennium	Technology
At the end of this millennium	The environment
In a millennium	Transport/ Travel
In two millennia	War
In a million years	Work

Useful phrases
… will be (exactly/ more or less) the same.
… will be (slightly/ quite a lot/ completely) different.
… will be better/ faster/ cheaper/ more common/ possible.

What language could you use to talk about how likely things are to happen? Use that language to discuss some inventions from the next page.

Predict whether the things in italics on the next page will definitely happen at some time (+), might happen at some time (?) or will definitely never happen (-).

You can find analysis of the future possibility of the inventions in italics on the Internet. Choose one of the things in italics that you would like to learn more about, search for details on it online, and read and check whether your prediction was correct.

Underline or copy down positive, negative and mixed words in the text to check the probability that it exists.

Find three similar texts and change one to make it much more unlikely or likely than it presently suggests. Explain all three texts then see if your partners can guess which one you changed.

- A cure for criminality

- A world government

- Androids/ Robots which are indistinguishable from people

- *Bionic limbs*

- Breeding of extinct animals

- Chips in our brains

- Computer generated film stars/ television personalities

- *Cryonic suspension*

- Driverless cars/ Robotaxis

- Eternal life

- *Face scanner (= Scanning your face instead of using a key or taking a fingerprint)*

- Finding alien life

- *Flexible displays (= Computer displays that can be bent like paper)*

- Flying cars

- *Generation ships (= Generations of people living and breeding on a spaceship on their way to another planet)*

- *Gravitational shielding (= Anti-gravity)*

- Growing of human organs

- Human cloning

- *Human teleportation*

- Invisibility/ A personal cloaking device

- Laser guns with the possibility of stun settings

- *Lightsabers*

- Limitless cheap electrical energy, e.g. from fusion reactors

- Lunar and interplanetary tourism

- Medicines which improve our intelligence

- Permanent settlements on other planets

- Personal force field shields

- Reading people's minds

- Recording dreams

- *Replicator (= A machine that can scan and copy anything)*

- Reprogramming people's minds

- *Robotic exoskeleton (= An external artificial skeleton that makes you stronger)*
