

## Irregular Plurals Reversi

### Instructions for teachers

*Cut up one pack of cards per group of two to four students, leaving the two halves of one card with the singular and plural still joined to each other (i.e. don't cut out each individual square of the table). Give out the cards and ask students to fold them so that one side has the singular and the other side has the plural and put them anywhere they like on the table, either side top.*

*One student chooses a card and says what they think is on the other side, perhaps saying "One..." with the singular version and "Some..." with the plural version to help them check. They turn the card over to check, leaving it the other way up. They continue doing this with other cards until they give up or make a mistake. If they make a mistake before they give up, then they can't take any of the cards that they guessed correctly and all those cards stay on the table for the next person to try (but the other way round as they are now upside down). If they give up before making any mistakes, they can keep all of the cards that they guessed correctly in that round and score one point for each. The next person then does the same (with cards that other people tried before, new ones that anyone hasn't tried yet, or probably a mix of both kinds). Each time, they can quit after just one card or (theoretically) continue until the whole table is cleared in one go, but they lose all the cards from that round if they make a mistake. After all the cards have been taken or you stop the game, they can write "one" and "some" on the right side of each card and/ or test each other on the plurals orally using a un-cut-up copy of the worksheets.*
