

**Medical English- Present Progressive Mimes
with synonyms for medical words**

Choose lines from below and act them out until your partner guesses what you are doing. You can't make any sound, but you can use things in the class if you like. If your partner still can't guess, let them look at the list below.

Ask about any lines which you can't understand, acting them out each time to show that you understand the explanations.

Test each other on the synonyms below.
