

Preposition Dice Games

One student rolls a dice twice to makes a sentence from the grid that they are using. If everyone is looking at the dice or that student shouts out the sentence, they can then race to put something or throw something in that place in the classroom (or in that place with respect to flashcards of those things), or they can race to draw something (e.g. a ball) in that place. Another possibility is for the dice to decide where the next flashcard will be placed around the classroom, to play a memory game with afterwards. Alternatively, one student can secretly roll the dice and put something in that place and the other students race to shout out the correct sentence.

They can then make similar grids on the last page to play games from above with.

Simple prepositions dice game grids

1	one	on	the table
2	two	in	a chair
3	three	under	the whiteboard
4	four	on	the CD player
5	five	in	a bag
