

Subject Question Trivia Quizzes

Try to make a general knowledge question using one of the question starters below which only one person in the class will get right. You won't get any points if more than one person gets it right, or if no one can guess correctly.

Example trivia subject question starters

Do the same with other who, which, whose and what questions, this time without looking at the suggested question starters.

Do the opposite, giving your partner an answer and seeing if they can think of a question which that is the answer to. Other questions which you didn't think of are also okay, as long as there aren't other more obvious answers to that question.
