

## Superlatives Pictionary Challenge

### Instructions for the teacher

Photocopy the animals and adjectives on different coloured paper, e.g. blue for the animals and pink for the superlatives. Note that some superlatives are repeated.

### Rules of the game

Students take cards from the top of two packs or from cards spread face down across the table. In the latter case, the cards go back in the same places after and they can try to find particular words again if they like. They then try to draw what the two cards say. The pictures must still clearly be the animal that they are supposed to be, e.g. "the smallest crab" must still clearly look like a crab.

After finishing the game, they can test each other on the superlative forms of the cards that they were just using.
