

Time Expressions- Same or Different

Dates, times, frequency expressions, past times and future times

Without looking below, listen to your teacher and raise one of the cards that you've been given depending on what you think about the meanings of the times that you hear. If you hear more than two, they are all the same or all different (i.e. there is not just one odd one out).

Label the lines below with S for the same meanings or D for different meanings.

Check your answers as a class.

Test each other by:

- Playing the same holding up cards game with the times below
- Playing the holding up cards game with other pairs of times that you make up yourself
- Reading out a time and seeing if your partner can say the same time in a different way
